

7/7/2026

Time for building docs (In CI)

python-docs-theme

→ CPython: docs are built in parts;
each CI test are 2-3 mins;
doctest take → 7 to 8 mins

not part
of build CI

→ ~~Scipy~~ (from pull request 153228)

pydata sphinx theme

→ Scipy: 19 min 4 sec (circle CI)

build-docs CI for PR 25577

time taken in building docs (spin docs-j)
= 17 min 12 sec

pydata sphinx theme

→ NumPy: 19 min 6 sec (circle CI)

build CI for PR 31895

→ installing dependencies = 1m 25s

→ build NumPy = 7m 56s

→ build devdocs w/ref warnings = 7m 7s

→ doctests = 1m 8 sec

↳ part of build CI

pydata sphinx theme

→ NetworkX: 12 mins (circle CI)

documentation build CI from PR 8740

→ Build docs step → 10m 5s

`make -C docs / SPHINXOPTS="j 2"
html

For projects using ReadTheDocs, the build logs are at app.readthedocs.org/projects/<project-name>; instead of Github CI.
 (★) The Github CI has preview link! mins.

Diff. b/w sphinx & RTD:

Sphinx → docs generator (.rst → html or pdf)

RTD → uses sphinx under the hood
→ hosting/build platform

sphinx-std-theme → sphinx theme

dask-sphinx-theme

Dask → 8m 45 sec

→ PR 12494 ; build 33473552

→ 7.13 min in build step

"sphinx -T -b html -d ..."

furo

Pytest → version latest / stable builds are usually 4-5 mins

→ PR builds are 1-2 mins

~~Reusables~~

CPython Docs

- docsbuild-scripts^{repo} used to build docs
- reusable-docs.yml → 5-6 mins
- doc.yml → doc → 2 mins
- doctest → 13 min 32 sec

PR#153043

- extra: buildbot.python.org/all → builds cpython on different arch.

- reusable-check-html-ids.yml

Pydata sphinx

Pandas (PR 66190)

→ doc test - 5 min

Ⓢ build & upload → 12 min 51 sec

→ Pyodide build → 19 min

3 min 54 sec → build pandas step

6 min 57 sec → build documentation step
(using pixi)

Scikit-learn PR-34438 - circle CI

→ doc-min-dependencies → 15 min 6 sec

→ doc → 11 min 35 sec

→ Pyodide build & mostly either skipped
or failing in past few weeks.

Xarray

→ readthedocs.org/projects/xarray

→ PR 11442 → 10 min 52 sec

Matplotlib

→ PR 32006 - circle CI

→ docs-python3 → 14 min 26 sec

//_

Astropy (RTD)

→ PR 20008 → 10 min 6 sec

SymPy (PR 3018)

→ circle ci (Build Docs preview)

→ 11 min 9 sec

→ Pyodide - 4 group tests (15-17 min each)

→ Doc tests → 8 mins

→ Test / Build Docs → 19 mins

→ it also test sphinx?

SciKit-image → PR 8240

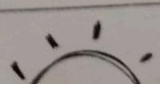

→ circleci (doc) → 17 min 29 sec

↙
7 min installing
dependencies

→ 10 min
building
docs

→ Test docs → 9 min

→ Pyodide → 8 min

statsmodels (PR 9845)

→ Generate documentation / build (3.10)

↓
includes nb build time ← 37 min

→ Pyodide using CIBW → 23 min

Issues in statsmodels.

→ update Adviz attribute - in notebook

→ nodejs2 warning

→ pd.datetime → format not specified

→ cache mechanism

→ auto summary - optimise?

→ ~~other~~

→ have multiple docs CI workflows instead of just one -- separate for nb, examples.

→ other warnings & errors during build of docs

→ joblib error under my PR

→ maybe should call joblib after build?

Pytorch

→ some docs CI runs are always skipped under PRs

→ PR #189105

→ 6min → `build-docs-cpp-false`

→ 14min → " " `python` "

→ 18min → `linux-jammy-py3.10-gcc`

→ 22min → " (`docs-test`)

⊛ Maybe we can use the timestamps on the Github workflow CI runs to benchmark how long did each step took?
