WORK EXPERIENCE

Intern - Quansight Labs

July 2026 - October 2026

Designing a profiling infrastructure for [Sphinx](#) documentation builds, enabling fine-grained benchmarking to identify performance bottlenecks and contributing optimisations across the Sphinx documentation ecosystem. [WIP - [Code](#)]

Independent Contractor - NumFOCUS ([Scikit-image](#))

November 2024 - March 2025

Designed and incorporated an 'entry-point' based API dispatch mechanism for scikit-image, collaborating with maintainers from scikit-image, [cuCIM](#) and various other Scientific Python projects; contributed towards supporting other general activities in scikit-image. [See [final report](#) for more]

Contributor - Google Summer of Code (NumFOCUS)

May 2024 - August 2024

Integrated [NetworkX](#)'s and [joblib](#)'s configuration systems into [nx-parallel](#), switched the build tool from hatchling to setuptools, automated backend metadata updation through a pre-commit hook, improved and provided custom chunking capabilities for all existing algorithms. Beyond the proposed items, created a conda-forge feedstock for nx-parallel, started discussions on the future directions nx-parallel could go and accomplished various other enhancement and maintenance goals. [See [Final report](#) and [Bi-weekly blogs](#) for more]

Independent Contractor - NumFOCUS ([NetworkX](#))

Jan 2024 - Mar 2024

Developed on [nx-parallel](#), a newly added parallel backend for NetworkX utilizing [joblib](#) to parallelize graph algorithms; set up the [asv benchmarks](#); analyzed the effects of chunking on speedups; added 15 parallel graph algorithms; integrated the 'entry-point' that exports backend metadata to networkx. [See [blogs](#) for more]

Technical Skills: Software Engineering (API design, API dispatching, testing ([pytest](#)), benchmarking and profiling ([ASV](#), cProfile, pstats, gprof2dot, SnakeViz), GitHub Actions (CI/CD), pre-commit and automating workflows, shell scripting), Packaging (setuptools, hatchling, Python packaging ecosystem, conda-forge), Scientific Python ([joblib](#) (parallel algos), [NetworkX](#) (graph algos), [scikit-image](#) (image analysis), NumPy), documentation (Sphinx, technical documentation, developer guides), collaboration (code review, issue tracking, open-source governance, maintaining large OSS and community).

VOLUNTEERING AND ACHIEVEMENTS

- Maintainer/Core Developer - [NetworkX](#), [nx-parallel](#), [Scientific Python](#), [Conda Forge](#) (feedstock maintainer)
- Google Summer of Code 2025 Mentor (NumFOCUS - NetworkX) [May 2025 - Aug 2025] [[Project Link](#)]
- Presented talks, posters, sprints at EuroSciPy, SciPy US, PyCon India, PyData Global, PyHEP, IndiaFOSS, RootConf and other local events in India [[Archive](#)]
- Communities and conferences: [SciPy India](#) (organizer), SciPy 2025 ([proceedings paper reviewer](#)), IndiaFOSS 2025 ("FOSS in Science" devroom manager.), [DISC Unconference 2025](#), GSoC Alumni CAMP, New Delhi 2026 (Unconference Session Lead and Host), PyData Global 2024 and [PyDelhi](#) (reviewer), PyCon US 2025 (mentor)
- All India Rank 686 (out of 39,210 candidates) in [GATE\(Data Science and AI\)](#) 2024
- Expository writings/notes - [Kruskal's algorithm-blog](#), [Math food play](#), [LCG and Randomness](#) and [more!](#)
- Workshops/courses - HSF-India workshop, Deep Learning(Top 5%), Social Networks(Top 1%) (Certificates on [LinkedIn](#))

PROJECTS

E-commerce Website

[[Code](#)]

A Flask-based e-commerce web app, featuring CRUD APIs, RBAC authentication. Features like order placement, inventory management, scheduled tasks (emailing reminders/reports), product recommendations, and other diverse functionalities for the 5 user types.

Technical Skills: Python, Flask, flask-restx, Docker, SQLite(RDBMS), sklearn, Celery, HTML, flask-mail, Github, shell scripting, Stripe (online payments API), Twilio (message sending API), Swagger

EDUCATION

University of Delhi

Bachelor of Science (Honors) Computer Science

2021 - 2024
